

McAfee Total Protection for Small Business Solutions

The always on, always up-to-date, single solution for protecting your business

McAfee® offers two integrated solutions targeted at small businesses (5–100 nodes), McAfee Total Protection for Small Business—Advanced and McAfee Total Protection for Small Business, to provide always on, always up-to-date protection across desktops, servers, and e-mail. Delivered as a service, your small business is protected from viruses, spyware, adware, spam, phishing, hacker attacks, identity thieves, and more, all without the hassle and cost of maintaining it yourself.

McAfee Total Protection for Small Business solutions are differentiated from the competition by providing integrated protection in one easy-to-deploy agent, automated updates, proactive malware protection, and access to the McAfee SecurityCenter, a Web-based console for security reports and configuration changes.

Anti-virus—Total Protection for Small Business solutions provide advanced, proactive protection from viruses and malware for PCs and servers, and they include automatic updating features to continuously secure your users.

Anti-spyware—Total Protection for Small Business solutions use true On-Access scanning to identify, proactively block, and safely eliminate potentially unwanted programs (PUPs) using the industry's most comprehensive database of PUPs.

Desktop firewall—Total Protection for Small Business solutions provide protection against intrusions, worm outbreaks, and other advanced threats.

Anti-spam—Total Protection for Small Business—Advanced provides total e-mail protection from spam, phishing, viruses, and Denial of Service (DoS) attacks, and it includes automatic disaster recovery capabilities.

Single management console—The McAfee SecurityCenter provides innovative, Web-based management that incorporates reporting and configuration and eliminates the cost of dedicated onsite management servers.

Partner management—McAfee Partner Security Services is a unique program that empowers the partner to deliver a fully managed service solution that will increase account control and enhance revenue generation.
